

Italstrut distribuisce la sua vasta gamma di prodotti per i mercati Nazionali ed internazionali e specificatamente operante nelle seguenti sfere di attività:

Italstrut distributes its wide range of products in the national and international market. The firm operates precisely in the following activities:

Impiantistica - Plant Design

- Idraulica
- Elettrica
- Bordo Macchina (facility)
- Termoventilazione e canalizzazione Aria / Gas
- Clean Rooms
- Petrochimica
- Antincendio Gas/acqua
- Hydraulics
- Electronics
- Facility
- Thermal ventilation, air and gas canalization
- Clean Rooms
- Petrochemical
- Fire-fighting systems

Edilizia - Building Trade

- Produzione di profilati di ancoraggio a passo variabile delle asolature
- Produzione di piastre nodali di sostegno lastre e di controventi strutturali
- Progettazione e casellario di strutture per pareti ventilate
- Production of anchorage channels to variable-pitch of buttonholes
- Production of central plate that supporting slabs and structural bracing
- Planning and recording of structures for ventilated walls

Lavorazioni Conto Terzi Processing-to-Order

Personalizzazione e Marchiatura di tutti i prodotti con brand del cliente, in grado di poter soddisfare tutte le più specifiche richieste di unicità produttiva di ogni cliente.

Uno staff tecnico professionale e competente, è in grado di soddisfare le più varie esigenze dei nostri clienti rispondendo ad ogni esigenza con flessibilità e qualità.

Italstrut s.r.l. produce in provincia di Milano profilati, mensole, piastre, collari per profilati e skid in acciaio al carbonio, nelle versioni decapate, zincate sendzimir, zincate a caldo e in acciaio inossidabile.

3 linee di profilatura automatizzate, 2 presse, 1 isola robotizzata di saldatura ed 1 linea di tranciatura, consentono ad Italstrut di produrre materiali standard e da disegno, oltre che offrire servizi di Ingegneria strutturale rivolte all'impiantistica ed all'edilizia dei rivestimenti architettonici e delle energie Rinnovabili.

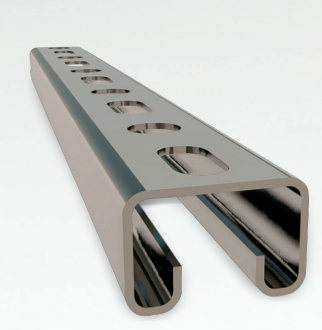

Italstrut s.r.l. operates in the province of Milan. The company manufactures profile shapes, corbels, plates, collars, carbon steel skid, in different versions: pickling method, sendzimir galvanised, hot-dipped galvanised and stainless steel.

Three lines of automated profiling, two presses, an automatic specialist welding system and a shearing line allow to produce standard and drawing materials. Furthermore, we offer structural engineering services applied to plant building, construction of architectural coating and building of renewable energy.
